Quick User Guide

First time set up:

- 1- Download the application called "PhotoFast" (A) on your smart device (APP available on the App Store for iOS and Google play for Android).
- 2- After the app is installed, when launched for the first time, please grant app access permission for bluetooth Contacts, Calendar, photos and Notification. So the app can backup your data correctly.
- 3- Close the App
- 4- Follow below steps (insert the SD card, plug the PHOTOCUBE into Wall Charger, plug the cable in PHOTOCUBE and Your device and plug the Wall Charger into an wall outlet to charge.

QR codes to download the app

5-The App will automatically open and start backing up all your pictures, contacts etc... for the first time this process might take a few minutes depending on how many pictures you have, but thereafter, the automatic back up process while charging with TOKK™ PHOTO CUBE will be very fast as it will only back up the new pictures.

Image above is for your reference only, screen may look different based on your device model. Please refer to the information in the next page.

Note: This will erase the External Storage/memory card, use with caution!

Help

About ONE Term of use and legal disclaimer of the app.

Report Bug Send feedback or product related issues to PhotoFast Support (require email to be setup correctly on your device).

Frequent Asked Questions

1. How do I backup calendar, contacts, photos and videos on my phone?

2. How do I restore data from PhotoCube to my phone?

3. Can I use other apps on my phone while backup is in progress?

4. Does backup affect the charging speed?

5. If I cancel the backup while it's running, does it start from the beginning again in the next backup?

6. After the photo backup is done, if I delete photos from my phone, does it get deleted on the PhotoCube, too?

7. I have a lot of photos on my iPhone, but PhotoFast app only backed up some of them.

8. If you are using iCloud to backup your camera roll, some of the photos/videos may not be stored on your iOS device, especially if the phone storage is low. But iOS shows the total media count to indicate how many items you have in total.

9. If you also wish to back up photos/videos stored in iCloud backup, turn "iCloud contents" From (Settings > Photo > iCloud contents).

10. I have more than one phone/tablet, can I use PhotoCube to backup them? Yes, PhotoCube supports backing up contents from multiple devices. Data from different devices are stored under different folders in "Backup" of External Storage.

11. Can I use other apps on my phone while backup is in progress? Because there is a large amount of files the app has to index and transfer for first time backup. We recommend user keep the non-essential apps closed during the 1st backup. After the 1st backup is completed, it's fine to use other apps while the app is performing "Differential Backup".

12. Does the app support backup of chat history for WhatsApp/LINE/WeChat? Chat history for 3rd party apps are not supported at the moment.

13. Are all USB Type-C cables supported? All USB Type-C cables that support data sync/transfer can be used with our product. Some cables that support charging-only cannot be used with our product.

To restore back data back to a different phone:

Go to [External Storage/Backup(name of old device)], copy or move the calendar/contact/photo folders to [External Storage/Backup(name of new device)]. And follow the same procedures as above section.

3. Can I backup only some photos from my camera roll/gallery? Yes, go to [External Storage > Add > From Camera Roll] to select the photos/videos you want to backup.

4. How long will it take to complete backup my photos? It depends on the number of photos/videos there are on the phone, and the speed of the memory card is also a factor. Generally it takes approx. 1 hour to backup 6000 – 8000 photos (at transfer speed of 30 MB/s).

5. If I cancel the backup while it's running, does it start from the beginning again in the next backup? No, PhotoFast app will perform "Differential backup" for photos/videos. If the backup is interrupted for some reason, it will resume from photos/videos that haven't been backed up.

6. After the photo backup is done, if I delete photos from my phone, does it get deleted on the PhotoCube, too? No, PhotoFast app only adds backup data to the PhotoCube. It will never delete files without your consent.

7. I have a lot of photos on my iPhone, but PhotoFast app only backed up some of them.

8. If you are using iCloud to backup your camera roll, some of the photos/videos may not be stored on your iOS device, especially if the phone storage is low. But iOS shows the total media count to indicate how many items you have in total.

9. If you also wish to back up photos/videos stored in iCloud backup, turn "iCloud contents" From (Settings > Photo > iCloud contents).

10. I have more than one phone/tablet, can I use PhotoCube to backup them? Yes, PhotoCube supports backing up contents from multiple devices. Data from different devices are stored under different folders in "Backup" of External Storage.

11. Can I use other apps on my phone while backup is in progress? Because there is a large amount of files the app has to index and transfer for first time backup. We recommend user keep the non-essential apps closed during the 1st backup. After the 1st backup is completed, it's fine to use other apps while the app is performing "Differential Backup".

12. Does the app support backup of chat history for WhatsApp/LINE/WeChat? Chat history for 3rd party apps are not supported at the moment.

13. Are all USB Type-C cables supported? All USB Type-C cables that support data sync/transfer can be used with our product. Some cables that support charging-only cannot be used with our product.
