1- Download the application called "iCookyCam" on your smart device (APP available on the App Store for iOS and Google play for Android)

Android

QR Code

iOS

QR Code

2- If you have a SD card, insert it in the Micro-SD Slot. --> in motion detection mode you will receive a notification and the footage will be recorded on the SD card, if you do not have an SD card you will receive a notification and will have to open app and record manually, the footage or picture will be stored on your smart device.

3- Turn on the camera

Pay attention to the direction of memory card!

4- open the app "iCookyCam"

5- add the camera (using the "+" sign on the app)

6- select "not been connected to the router"

7- go to WIFI settings on your smart device

8- wait until your camera name appears "iCooky_XXXXXX", it might take 2 to 3 minutes for the camera to set itself, so wait and refresh your wifi until the camera appears as a choice, when it appears select it, (it should ask you for the password, type "12345678" and join), wait for iCooky... to connect, you might have to type the password a couple of times

9- go back to the app "iCookyCam", press "next"

10- add device password "ok123456" and change the name Camera to the name you want your camera to be called (if you have multiple ones this might come in handy, to name Entrance, Lobby, Room 1...) then click on the check mark "V" on the upper right corner of the app.

11- a message "connect to router" appear, if you want to connect your camera to your wifi to keep it at home press "yes" then select the name of your Home Wifi router and type your password.

12- When you see the message "camera successfully added", and a black screen with the camera status "online" you have successfully set-up with your TOKK Cam. Turn off the camera and turn it on again to finalise the set up. It should say online, and select the image and touch the play icon, the live feed of the camera will appear. If the camera says offline, refer to troubleshooting in the next two page.

2. Power ON / Power OFF Operation

If you have a Micro SD Card proceed to 2.1, if you do not have a Micro SD Card proceed to 2.2.

2.1

Insert Micro SD Card Class 10 or above is recommended. Maximum support 64GB, Please format memory card before using.

Warm Prompt: Pay attention to the direction of memory card!

2.2

Power ON: Connect the camera to power supply or long press confirmation button for 3 seconds, Red & Blue indicator keeps on and then alternate scintillation, camera starts to initialize (it takes around 60 seconds). After initialization succeed red indicator flashes slowly, camera enters AP connection mode and starts recording automatically. Press confirmation button once to stop video recording, blue indicator keeps on and the camera turns to standby mode.

Warm Prompt:

1. If you want to power on without connecting to the USB charger, make sure that the camera has enough power!

2. If after initialization succeed red indicator flashes slowly, show that the machine is in the IP connection mode, please double click confirmation button to return to AP connection mode and blue indicator flashes slowly.

2.3

If the memory card is not inserted, the red and blue indicator flicker at the same time when the machine is initialized, and the camera can't turn on the video. Memory card does not support hot swap, if you want to pull off or insert the memory card, Please turn off the camera first.

2.4

Power OFF: long press confirmation button for 6 seconds, Red & Blue indicator flashes for 7 times and turn off.

Warm Prompt: It is not possible to power off the camera through the above operation when USB power is connected.

3. Connect the Camera to the App

3.1

Go to WIFI settings on your smart device, choose Power "iCooky_****" from available networks when prompted for a password, type "12345678" and join.

3.2

Power ON: Connect the camera to power supply or long press confirmation button for 3 seconds, Red & Blue indicator keeps on and then alternate scintillation, camera starts to initialize (it takes around 60 seconds). After initialization succeed red indicator flashes slowly, camera enters AP connection mode and starts recording automatically. Press confirmation button once to stop video recording, blue indicator keeps on and the camera turns to standby mode.

Warm Prompt:

1. If you want to power on without connecting to the USB charger, make sure that the camera has enough power!

2. If after initialization succeed red indicator flashes slowly, show that the machine is in the IP connection mode, please double click confirmation button to return to AP connection mode and blue indicator flashes slowly.

3.3

If the memory card is not inserted, the red and blue indicator flicker at the same time when the machine is initialized, and the camera can't turn on the video. Memory card does not support hot swap, if you want to pull off or insert the memory card, Please turn off the camera first.

3.4

Power OFF: long press confirmation button for 6 seconds, Red & Blue indicator flashes for 7 times and turn off.

Warm Prompt: It is not possible to power off the camera through the above operation when USB power is connected.

4. If you do not want to connect the Camera to your Home or Office WIFI:

3.1

Go to WIFI settings on your smart device, choose Power "iCooky_****" from available networks when prompted for a password, type "12345678" and join.

3.2

Log into iCookyCam APP, click the "+" in the middle or below the interface, then choose "Not been connected to the router", click "Next" to enter the add device interface, input "ok123456" in the device password bar and then click "8". APP will prompt "Connect to the router?", please select "Yes" to enter the "Wi-Fi Network" setup interface. Choose the network you want to connect and input the right Wi-Fi password, then click "Connect" (P 3.2-1-3.2.7)

Warm Prompt: For your personal privacy, please change the default password of the camera

3.3

1. Please choose the right network and type in correct password. The camera turns to AP mode if wrong password were typed in, blue indicator flashes slowly in AP mode. Please click Delete on APP and withdraw from APP, check out APP and add a device again. 2. In order to improve the stability and success rate of WIFI connection, try to be close to the wireless router. 3. For initial use, the device requires a certain amount of time for IP connection. Please wait patiently. (About 1-3 minutes based on network conditions). After the IP connection is successful, the red indicator flashes slowly. After multiple refresh, if still showing offline, please try to check the network environment of the device and the mobile phone is good or not. 4. SSD with special characters and 5G network are both not compatible with APP. Only 2.4G frequency WIFI is supported, 5G frequency WIFI is not supported temporarily, and WIFI encryption mode can not be WEP mode, and the password can not be empty.

3.4

The camera starts to restart after click "Connect", Please wait for about 90 seconds, at the same time, APP automatically returns to the device list interface and successfully adds the camera to the list. Red indicator flashes slowly after the camera reboots, and the camera turns into IP connection mode. click the camera in the list to preview image and control the camera. (P 3.3.1-3.3.2)

4.2

To switch from IP connection mode to AP connection mode: Please double click Confirmation button.

Mark:

AP connection mode: Camera connect to Wi-Fi of smart phone for short distance preview image.

IP connection mode: Camera connect to router for unlimited distance preview image.

5. Add the camera manually

If the camera has been connected to the Internet to work in IP remote mode, when you want to add the camera to other people's APP, please open APP on the other's phone, click the "+" in the middle or below the interface, select the "Been connected to the router" and enter to the "Lan Search" interface. (P 5.1-5.3)

5.1

Search addition under the same WIFI

If the mobile phone and the camera are connected to the same WIFI, then in the "Lan Search" interface will automatically search all the camera serial numbers under the WIFI, select the camera that you need to add, and input device password (the default password is "ok123456") can be added successfully. (P 5.1.1-5.1.2)

5.2

Adding your camera to another Smart Phone:

Open the APP that has already added the camera, find the camera that needs to be added in the device list, and click the share button in the lower right corner to automatically generate a camera QR code. Open the APP on the phone that needs to add the camera, enter the "Lan Search" interface, click the QR code scan button in the lower left corner to open the scan window, scan the generated camera QR code, and then input the correct device password to add. (P 5.2.1-5.2.5)

5.3

Manual input addition

Open the APP that needs to add the camera, enter the "Lan Search" interface to select the manual add button in the lower right corner, and input the correct device UID and password in the "Add Device" interface to be added successfully. (P 5.3.1-5.3.2)
