QR Code for the App

A

If you have a SD card, insert it in the Micro-SD Slot (you can still install and use the camera if you do not have one) --> in motion detection mode you will receive a notification and the footage will be recorded on the SD card, if you do not have an SD card you will receive a notification and will have to open the app and record manually, the footage or picture will be stored on your smart device.

1- Plugg the Camera to charge (4) using the furnished micro USB cable, the camera automatically turns on.

2- Download the application called "Fowl" on your smart device (App available on the App Store for iOS and Google play for Android, or use QR code (A).

3- Go to WIFI settings on your smart device.

4- Wait until your camera name appears "OK_XXX", when it appears select it. (disregard messages like "unsecured network, or"/no internet access...") as long as "OK_XXX", is selected as your wifi network you can close the settings.

5- Open the "fowl" app, and Press Play to watch your camera video.

6- Configure your Wifi by pressing gearshift icon and set camera parameters.

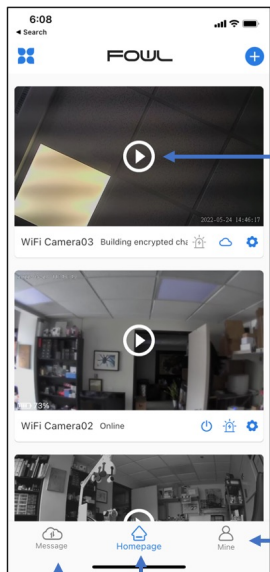

7- Select Wifi Settings and enter your home Wifi and Password.

Now press the play button to view the live feed. Congrats you have set up your new TOKK™ CAM.
Check out all the fonctions of the camera and the App on our website in the support page.
