# (1) How to program your Admin Fingerprint Lock

1 Start with lock shackle closed

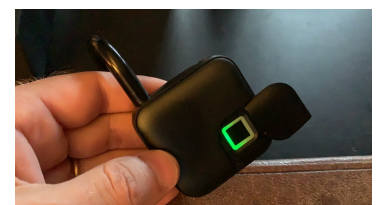

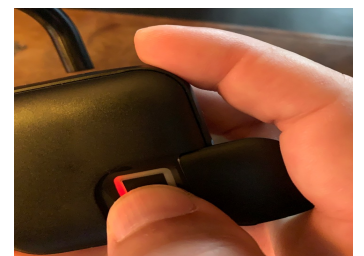

2 Press gently your finger on the sensor and keep pressing, you will hear a few "Beeps" and it will open the lock, keep pressing until you see a blue light, then release your finger, You will see a green light blinking.

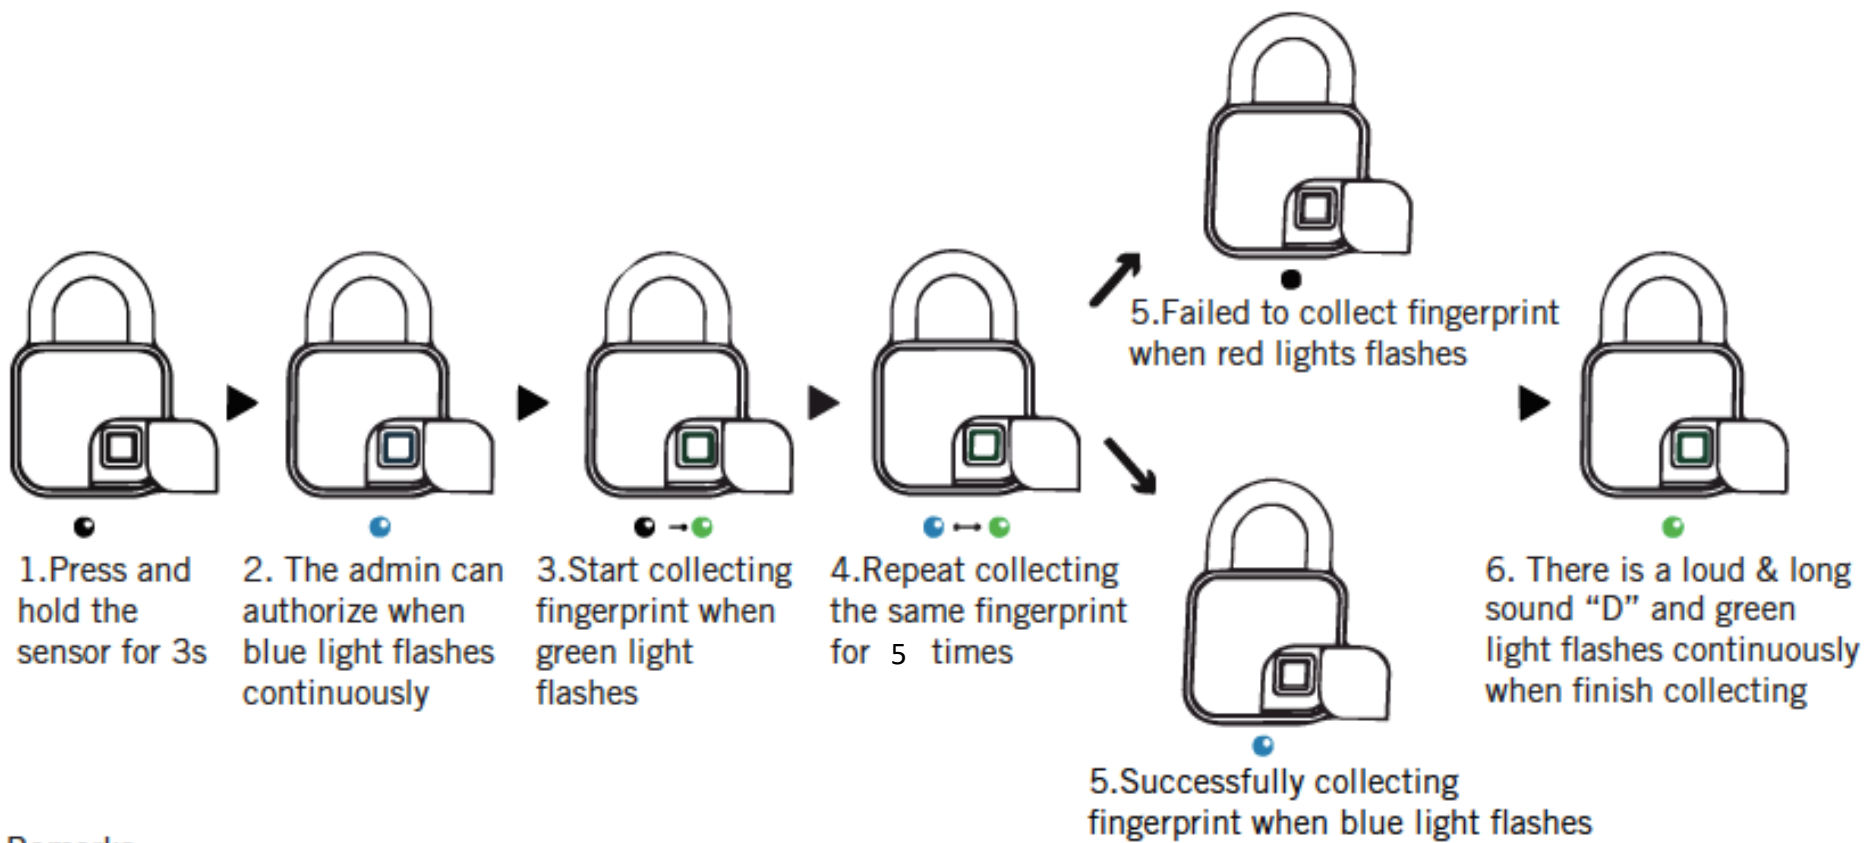

Press gently your finger on the sensor and release, each time you will hear a "Beep" and see either a blue light, or a red light.

3 You need five (5) blue lights to program the lock, if you get a red light, it means that the lock does not recognize your finger, So keep pressing and releasing…
…until you get 5 blue lights and hear a long "Beep" and see a stable green light. Then you are done. Congrats.
